

Discover all you can about Dysport Aesthetic at your next doctor's appointment. Qualified physicians can answer all of your questions about treatment, the administration process, and what to expect with Dysport Aesthetic. To help get the conversation started, here's a list of questions you may want to ask:

1 What is Dysport Aesthetic?

2 How does it work?

3 Will I notice any changes after my first treatment?

4 How long does it take to have an effect?

5 What results should I expect?

6 How can the results be maintained?

7 How is Dysport Aesthetic administered?

8 How long does the administration process take?

9 Are there any side effects?

10 Is Dysport Aesthetic right for me?

11 Where can I get Dysport Aesthetic?

12 When can I start treatment with Dysport Aesthetic?

13 Is there anything else I should know about Dysport Aesthetic?

**Remember:** It's essential to know all you can about any medication before starting treatment. Your doctor can give you important information about Dysport Aesthetic and can help prepare you for what to expect.

Once you have been treated with Dysport Aesthetic, your physician can provide you with the Drug Information Number (DIN), or this may appear on your receipt. Or, if you are given a patient brochure, see the back for an access code. Use your DIN or access code to sign in to the exclusive Dysport Aesthetic patient website for additional information and answers to frequently asked questions.
